How to create new database with old database as template

Dmitri Peredera - 2023-10-23 - Kommentarer (0) - Common questions

When creating new database, it is sometimes useful to copy configuration from existing database.

Note, **only works for SIB2 files**.

From the start screen, press *New database...*

Click on *Import from existing database* button

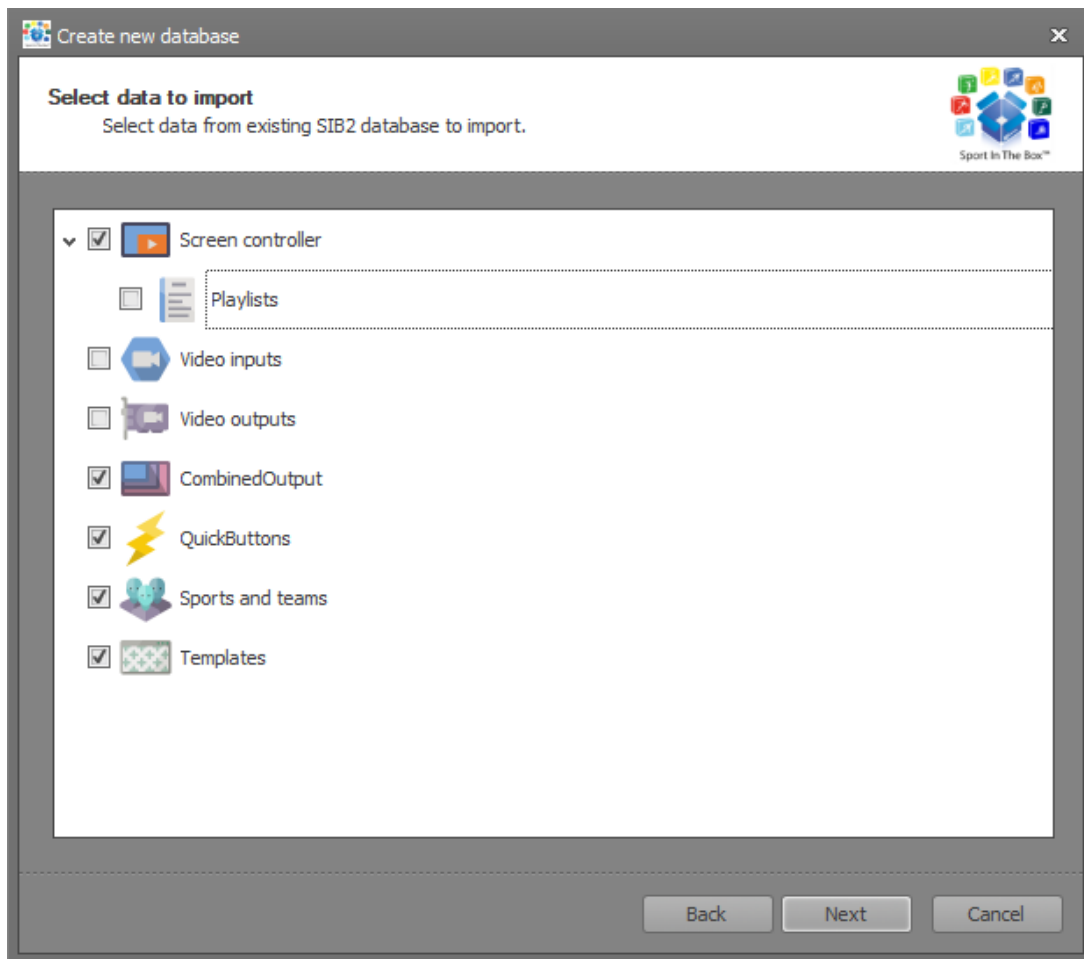

Click the *browse* button or on empty path area to select database.

New database name and path will be filled with suggested values, customize by typing or pressing the browse button.

Press next button and select settings to import.

Press *next* again to review the import settings.

Create new database

Database overview

Database information

Database name: Test_Files_vmw_copy.SIB2

Path: D:\SIB_REMOVE\DB_file_formats
Test_Files_vmw_copy.SIB2

Description: Test_Files_vmw_copy.SIB2

Sport: Floorball

Selected data to import

Screen controller
CombinedOutput
QuickButtons
Sports and teams
Templates

Check your information above and press Finish to create the database.

Back Finish Cancel

Press *Finish* to import data, window will close after the import and new database will be added to the start screen.
