How to create new database with old database as template

Dmitri Peredera - 2023-10-23 - [Kommentarer \(0\)](#) - [Common questions](#)

When creating new database, it is sometimes useful to copy configuration from existing database.

Note, **only works for SIB2 files**.

From the start screen, press *New database...*

Click on *Import from existing database* button

Create new database

Enter database path and name.

Sport In The Box™

Create new database Import from existing database

Select database to import from

Browse

Set new database details

Name

Browse

Next Cancel

Click the *browse* button or on empty path area to select database.

Select database to import from

Browse

D:\SIB_REMOVE\DB_file_formats\Test_Files_vmw.SIB2

New database name and path will be filled with suggested values, customize by typing or pressing the browse button.

Set new database details

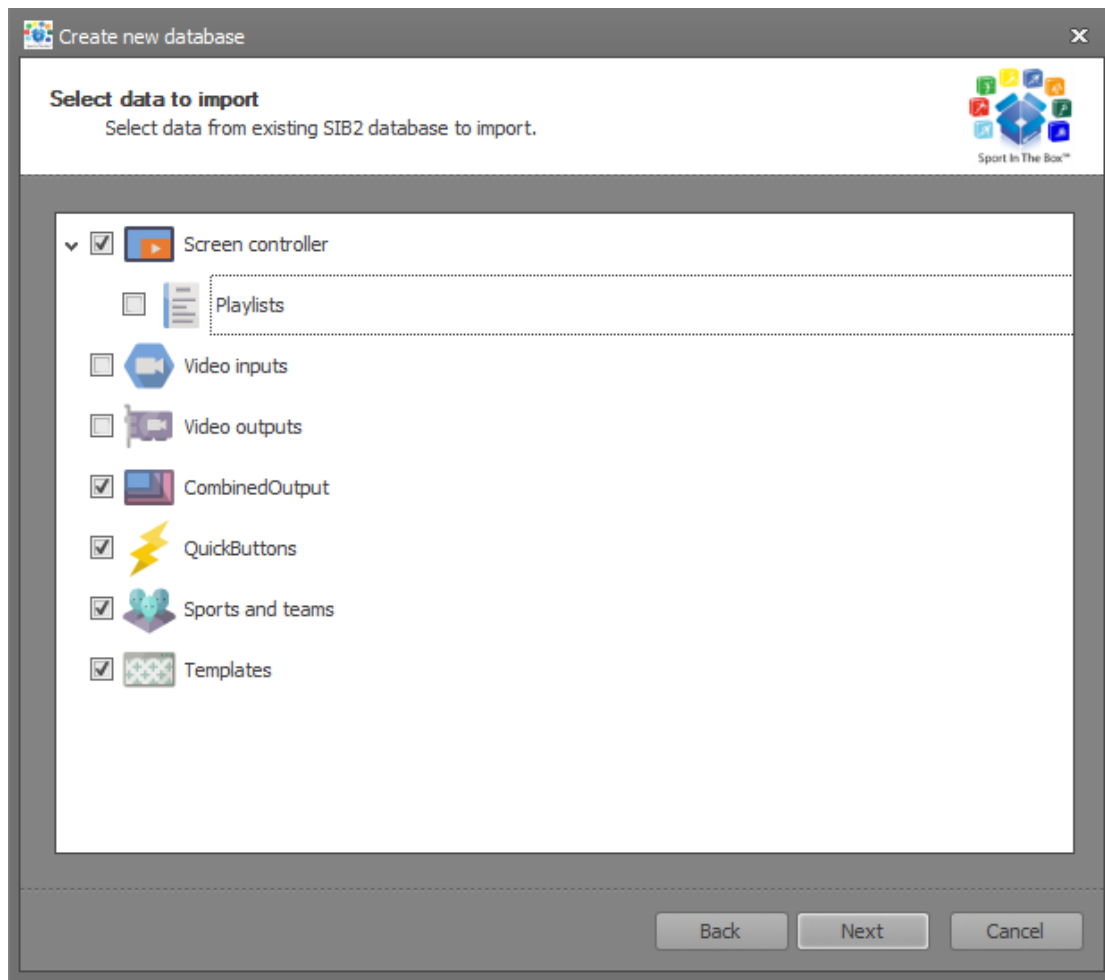

Name

Test_Files_vmw_copy.SIB2

Browse

D:\SIB_REMOVE\DB_file_formats\Test_Files_vmw_copy.SIB2

Press *_next_* button and select settings to import.

Press *next* again to review the import settings.

Create new database

Database overview

Database information

Database name: Test_Files_vmw_copy.SIB2

Path: D:\SIB_REMOVE\DB_file_formats
Test_Files_vmw_copy.SIB2

Description: Test_Files_vmw_copy.SIB2

Sport: Floorball
