To configure SITB2 with Hytek using UDP port go to:

					Timer (None) Pool 1			>	Scoreboard - Pool 1	E

Set it to Generic and UDP. (Also possible to use serial but then you need a serial connection between Hytek computer and SITB2).

	C Serial Port or USB to Serial

You also need to change IP adress here:

The selected address should be the one of the SITB2 computer.
