How to create new database with old database as template

Dmitri Peredera - 2023-10-23 - Comments (0) - Common questions

When creating new database, it is sometimes useful to copy configuration from existing database.

Note, **only works for SIB2 files**.

From the start screen, press *New database...*

Click on Import from existing database button

Click the *browse* button or on empty path area to select database.

New database name and path will be filled with suggested values, customize by typing or pressing the browse button.

Press _next_ button and select settings to import.

Press *next* again to review the import settings.

Press *Finish* to import data, window will close after the import and new database will be added to the start screen.
