How to tile with VideoWindow

Dmitri Peredera - 2023-10-23 - Comments (0) - Combined Output

LED screens are usually visible in Windows as regular monitors and have resolution like 800X600PX.

The picture from video above is **3200 x 96px** and represents a pre-manufactured content where each ICC logo can be a different vendor. It can be scaled with the *CombinedOutput*, but other way is to scale it with the *VideoWindow*.

Configure ScreenController

Got to the ScreenController settings and change vide format to *Custom* at **3.200 x 96 at 50fps**,

For the purpose of the tutorial, change background to white or color bars.

Screen controller

Name:

Main

Default background:

Colorbars HD

Video format

Video format:

Custom

Width:

3,200

Height:

96

Frame rate:

50

Default playlist settings

Default scaling:

Keep aspect ratio

Default image duration (sec):

10.00

Transition type:

Fade

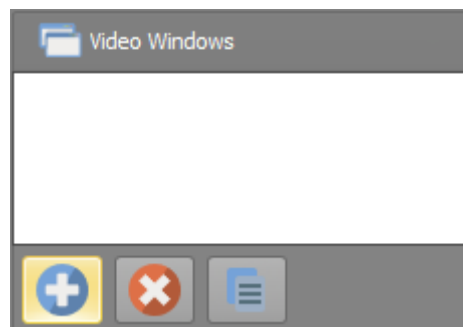

Duration (seconds):

0.20

Configure VideoWindows

Go to the *VideoWindow* settings and press *add* button to create new video window.

Window position can be changed either by changing values in settings or moving selected window.

Create first *VideoWindow* and set the source to the Main *ScreenController*. Main *ScreenController*

should be **3200 X 96px**.

Change window *width* and *crop width* to 1280.

Window

Name:

Window 1

Source:

Main

Format:

W: 3200, H: 96

Screen:

Screen 1 (Dell U2412M(Digital))

X:

0

Width:

1,280

Y:

0

Height:

96

Visible:

☒

Border:

Color correction

Audio

Audio enabled:

☐

Audio renderer:

Default Audio Device

Volume: 100%

Enable RMS overlay:

☐

Crop

Reset

Start X:

0

Width:

1,280

Start Y:

0

Height:

96

Press *copy* button and copy window two times.

Change values to match the following table.

Name	X	Y	Width	Height	Start X	Start Y	Crop width	Crop Height
Window 1	0	0	1280	96	0	0	1280	96
Window 2	0	96	1280	96	1280	0	1280	96
Window 3	0	192	640	96	2560	0	640	96

Note that last *Window 3* has less content that fit on the whole row. Both *width* and *crop*

width are set to the remaining content width.

Add files

Close settings window, go to the playlist and add file with the format of **3200 x 96px** and loop it.

Start playback.

The result, with the borders enabled will look like that:
