Sport In The Box 2 release - v2.25.0.

2026-10-01 - Dmitri Peredera - [Comments \(0\)](#) - [Sport In The Box Releases](#)

This version lets you drop files from Windows File Explorer at any position, fixes hiding a CG while a playlist is playing, and fixes problems that appeared when repairing an installation.

[Download](#)

Drag and drop from File Explorer to any position

You can now drag files from Windows File Explorer and drop them at any position. Previously, files could only be dropped at the last position.

CG hiding during playlist playback

Hiding a CG while a playlist is playing now works. Previously, the CG was not hidden.

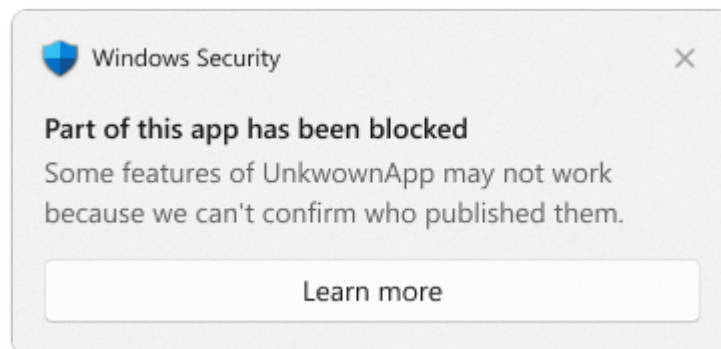

Installer repair

Fixed problems that occurred when the installer was run to repair an installation.

Score Pilot

Score Pilot has its own release notes: [link pending]

Known issues

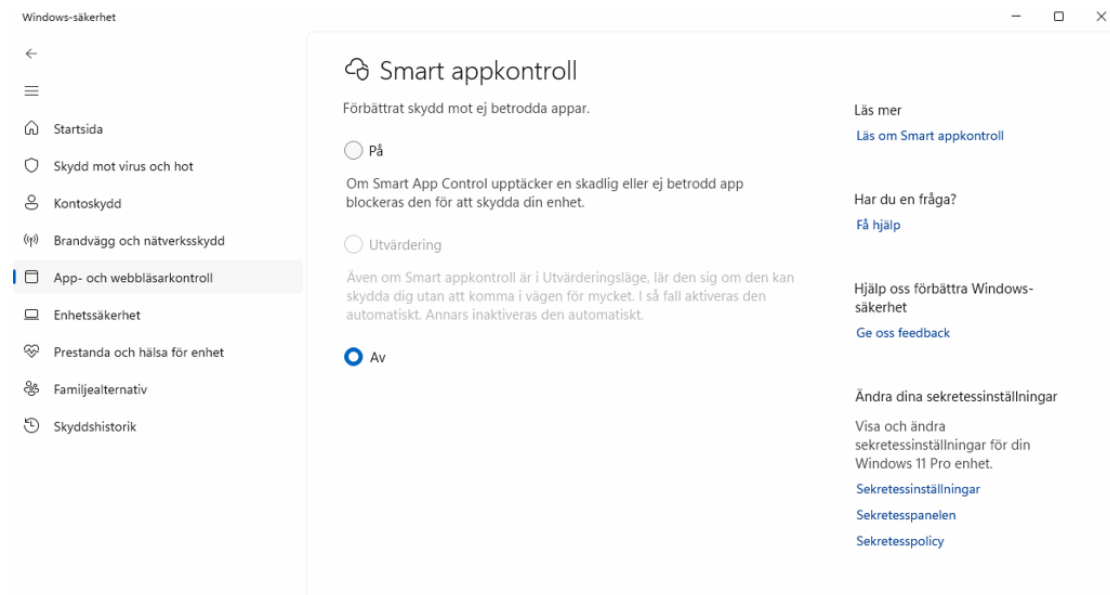

Installer fails on PCs with a Windows security policy

On some PCs the installer fails and undoes all its changes. The PC then shows the message "Your organization used Device Guard to block this app."

A Windows security policy causes this. Smart App Control or [App Control for Business](#) (formerly WDAC) blocked the video decoder from loading, so the installer could not finish. Microsoft describes how [Smart App Control](#) blocks files it can't verify. We are working on a fix.

Workaround: Turn Smart App Control off in Windows Security, run the installer, then turn it back on. The setting is under Windows Security > App & Browser Control > Smart App Control settings. See Microsoft's [Smart App Control FAQ](#).

We are working on a proper fix.
