How to create new database with old database as template

Dmitri Peredera - 2023-10-23 - Comments (0) - Common questions

When creating new database, it is sometimes useful to copy configuration from existing database.

Note, only works for SIB2 files.

From the start screen, press New database...

Click on Import from existing database button

🚾 Create new database	×
Enter database path and name.	Sport in The Box**
	J
Create new database Import from e	existing database
Select database to import from	
Browse	
Set new database details	
Name	
Browse	
	Next Cancel

Click the *browse* button or on empty path area to select database.

New database name and path will be filled with suggested values, customize by typing or pressing the browse button.

Mame	Test_Files_vmw_copy.SIB2			
Browse	D:\SIB_REMOVE\DB_file_formats\Test_Files_vmw_copy.SIB2			

Press _next_ button and select settings to import.

🔠 Create new database	×
