How to create a debug log for SIB

Dmitri Peredera - 2024-01-23 - Kommentarer (0) - Common questions

When there are problems that we can't resolve based on description or support team is unable to reproduce it on our side, we often ask you for a debug log.

Files to attach

We are, most likely will ask you to attach log files from Documents folder in
`%userprofile%\Documents\IC Control Media Sport\SITB2`

Files are called *mainlog* with different numbers.

Take all of those.

Is is normal that those exists are not empty.

When program hangs

When program hangs, actions must be taken while problem is still there. Don't close the program.

Download ProcessExplorer from

<https://learn.microsoft.com/en-us/sysinternals/downloads/process-explorer>

Open downloaded file and run *procexp64.exe*.

Find *Sport In The Box 2.exe* in list and create crash dumps. Create both mini and full dumps.

Save dumps in *C:\SIB\CrashDumps*.

When program crashes

Go to the folder *C:\SIB\CrashDumps*.

There may be a few of dump files, take the latest two or three.

Report bug

Upload *DUMP* files to file share like <https://wettransfer.com/> or OneDrive.

Create new ticket at <https://support.iccm mediasport.com/en-US/new-ticket> and attach *mainlog* and link to the uploaded *DUMP* files.

Give us a clue of who you are by including license and installation name.
